# Apache Isis™ CheatSheet

### Domain Objects (entities + view models)

- @DomainObject @DomainObjectLayout
- @ViewModelLayout
- @Property, @PropertyLayout
- @Collection, @CollectionLayout
- @Action, @ActionLayout
- @Parameter, @ParameterLayout
- @Title, @MemberOrder, @MemberGroupLayout
- @HomePage, @MinLength, @Programmatic
- @javax.inject.Inject inject services into object
- @javax.annotation.Nullable
- @javax.validation.constraints.Digits
- @lombok.Data; @lombok.Builder;
- @lombok.AllArgsConstructor

### Layout

Xxx.layout.xml is more flexible than @XxxLayout
title(), iconName(), cssClass(), layout()

### **Domain Entities** (javax.jdo.annotation)

- @PersistenceCapable, @DatastoreIdentity
- @Inheritance, @Discriminator; @Version
- @Queries, @Query;
- @Uniques, @Unique; @Indices, @Index
- @Persistent, @NotPersistent
- @Column, @PrimaryKey,@Join, @Element
- @XmIJavaTypeAdapter (PersistentEntityAdapter.class)

www.datanucleus.org/products/datanucleus/jdo/annotations.html

### JAXB View Models (javax.xml.bind.annotation)

- @XmRootElement; @XmlType
- @XmlAccessorType; @XmlTransient

#### **Domain Services**

- $@Domain Service \ @Domain Service Layout\\$
- @org.spring framework.stereotype. Service
- @Action, @MemberOrder (not props or colls)
- @PostConstruct ; @PreDestroy (javax.annotation)
- @javax.inject.Inject inject services into service

### Layout

menubars.layout.xml is more flexible than @DomainServiceLayout and @MemberOrder

#### **Domain Service Subscribers**

@org.springframework.context.event.EventListener

#### **Mixins**

@Mixin; 1-arg constructor of the mixee
Mixin props or colls must have 0 arguments, and
annotated with @Action(semantics=SAFE) and
@ActionLayout(contributed=AS\_ASSOCIATION)

### **Methods: Actions**

placeOrder(X x, Y y, Z z)

hidePlaceOrder(); disablePlaceOrder()

validate{0|1|2}PlaceOrder(X|Y|Z);

validatePlaceOrder(X x, Y y, Z z)

autoComplete{0|1|2}PlaceOrder(X,Y)

 $choices \{0\,|\,1\,|\,2\} PlaceOrder(X,Y) \; \hbox{\scriptsize (n-1 args)}$ 

default{0}PlaceOrder()

## Methods: Properties

- @lombok.Getter, @lombok.Setter;
- @javax.validation.constraints.Digits

getName(), setName();

hideName(); disableName(); validateName()

autoCompleteName(), choicesName()

#### **Methods: Collections**

@lombok.Getter, @lombok.Setter; getOrders(); hideOrders(); disableOrders();

#### **Events**

- @DomainObject(xxxLifecycleEvent=....)
- @DomainObjectLayout(xxxUiEvent=....)
- @Action(domainEvent=...) @Property(domainEvent=...)
- @Collection(domainEvent=...)

## RepositoryService

allMatches(Query) & QueryDefault(...), persist(), remove()

## MessageService

informUser(), warnUser(), raiseError()

## (some) other Applib Services

FactoryService, TitleService, ClockService, ConfigurationService, BookmarkService, EventBusService, BackgroundService, MetaModelService, IsisJdoSupport, WrapperFactory, CommandContext, QueryResultsCache

## **Error & Exception Handling**

 $Recoverable {\sf Exception}, Non {\sf Recoverable Exeption}$ 

### Value Types

8 primitive types + wrappers; BigDecimal, BigInteger; java.util.Date, java.time.{LocalDate|LocalDateTime|LocalTime} dates; JODA dates; java.sql.{Date|Time|Timestamp}; enums; value types library

## **Bootstrapping**

@SpringBootApplication; @SpringBootTest;
@Configuration; @Import; @ComponentScan
